

I understand that this practicum is a supervised, real world project where I will work with my classmates to review a website for accessibility. I know that Jacksonville Village, Ohio is a real client, and that this project reflects how this type of work is done professionally. I understand that my role is to find and document accessibility issues and suggest improvements, but not to contact the client or provide legal advice. I will act professionally and follow all course guidelines while completing this work. I am committed to this project that represents our school and most importantly the cybersecurity and networking program.
