

Subject: Invitation: Cybersecurity Capstone Presentation – Phishing Awareness Program

Dear President Betty Young, Vice President Jarrod Tudor, Chief Information Security Officer Joe Deer, and Program Lead Norma DePriest,

We would like to invite you to attend a cybersecurity capstone presentation by students in the Cybersecurity & Network Systems program at Hocking College.

As part of our capstone project, we have developed a Phishing Awareness Program in response to the recent increase in phishing activity at the college. This program includes user education, training, and risk reduction strategies designed for long-term implementation.

We will be presenting our findings and recommendations, and would value your attendance and feedback. The findings will allow participants to better recognize phishing threats, contribute to making a more secure online environment for the entire campus, and provide insight into areas that may need further improvement in the future.

Event Details:

Date: May 5th, 2026

Time: 3:00 pm

Location: JL354 – AI Lab

We appreciate your time and consideration, and hope you can attend. For any questions, please contact the Hocking CyberHawks at depriestn@hocking.edu.

Sincerely,

Hocking CyberHawks 2026
